

# Graduate Digest Emails

Automated email notifications are sent from the intlgrad@iu.edu account to department contacts to notify them of updates to a student's record or when departmental action may be required.

The automated email received may contain any or all of the notifications below, depending on which actions have been taken:

## **Bachelor Equivalency Review**

The students listed below have applications that need additional review from you. Please let us know if you have any questions.

A Bachelor's equivalency decision has been reached for each of the applicants listed below:

<List of Names>

## **New Document\***

A new document has been added to the record for each of the applicants below:

<List of Names>

*\*Please note that only academic records and OIS admit letters are visible in a department contact's Atlas view. If you do not see a new document, this is most likely because it is a financial document or an immigration document that was uploaded. No further action by the department is needed.*

## **Funding**

The students listed below are in the final states of admission; however we must have verification that they have accepted your department's funding offer before we can issue their admission letter and proof of funding. If a student has deferred from a previous term where funding was offered, the list below may reflect funding from a previous term. If you are no longer offering funding in this situation, please let us know.
